

Figure 1

FIG. 2

FIG. 2 is a block diagram of a computer system 200 and its network connections. The computer system 200 includes a central processing unit (CPU) 213, main memory 215, video memory 214, I/O 219, keyboard 210, mouse 211, mass storage 212, and a communication interface (COMM INT) 220. The CPU 213 is connected to the main memory 215 and video memory 214. The video memory 214 is connected to a video amplifier (VIDEO AMP) 216, which is connected to a cathode ray tube (CRT) 217. The I/O 219 is connected to the CPU 213. The keyboard 210 and mouse 211 are connected to the CPU 213. The mass storage 212 is connected to the main memory 215. The COMM INT 220 is connected to the main memory 215 and a network link. The network link connects the computer system 200 to a local network 222. The local network 222 includes a host 223 and an internet service provider (ISP) 224. The ISP 224 is connected to the internet 225, which is connected to a server 226. The network link also connects the computer system 200 to a local cable company 227. The local cable company 227 is connected to another local network 228, which is connected to a subscriber 229.
